

Nama : Tito Ghofara

NIM : A11.2020.12775

KELAS : 4303

REPOSITORI MINGGU 1

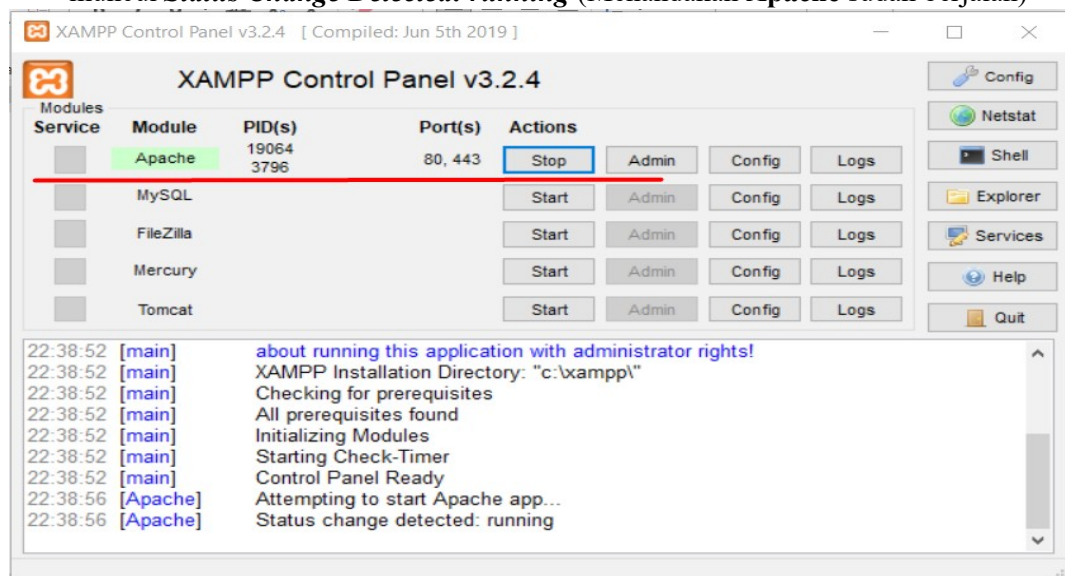

SELF PACED LEARNING

■ Instalasi WEB Server

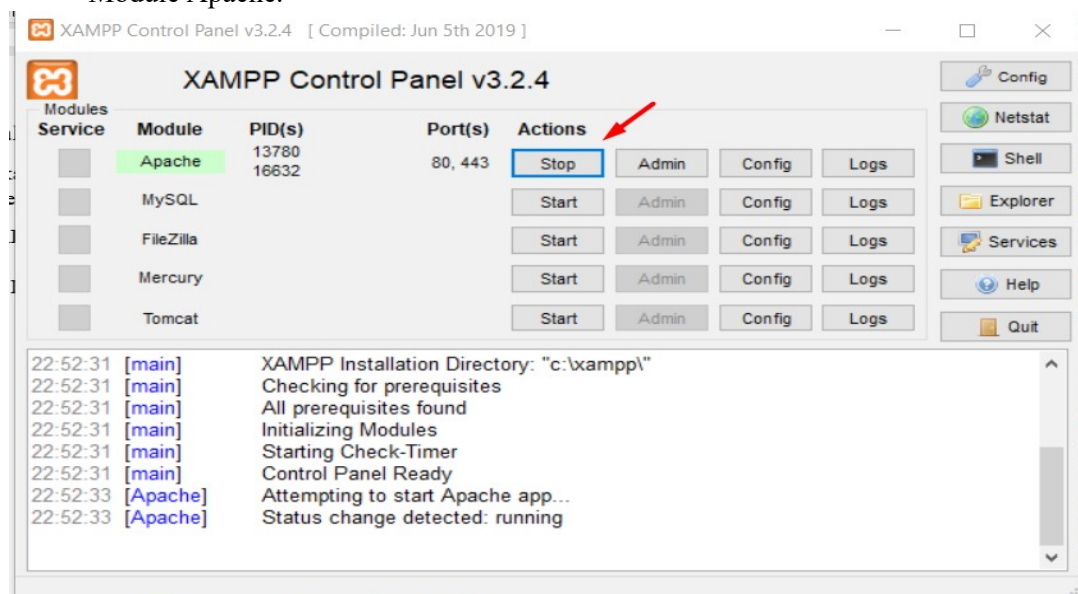

Dikarenakan saya sudah menginstal XAMPP dari Semester 1 maka saya menjalankan WEB Server Apache, PHP, MariaDB menggunakan aplikasi XAMPP.

1. APACHE

- I. Jalankan aplikasi XAMPP.
- II. Klik tombol Start pada Kolom Action pada Modul Apache. Setelah di klik akan muncul **Status Change Detected: running** (Menandakan Apache sudah berjalan)

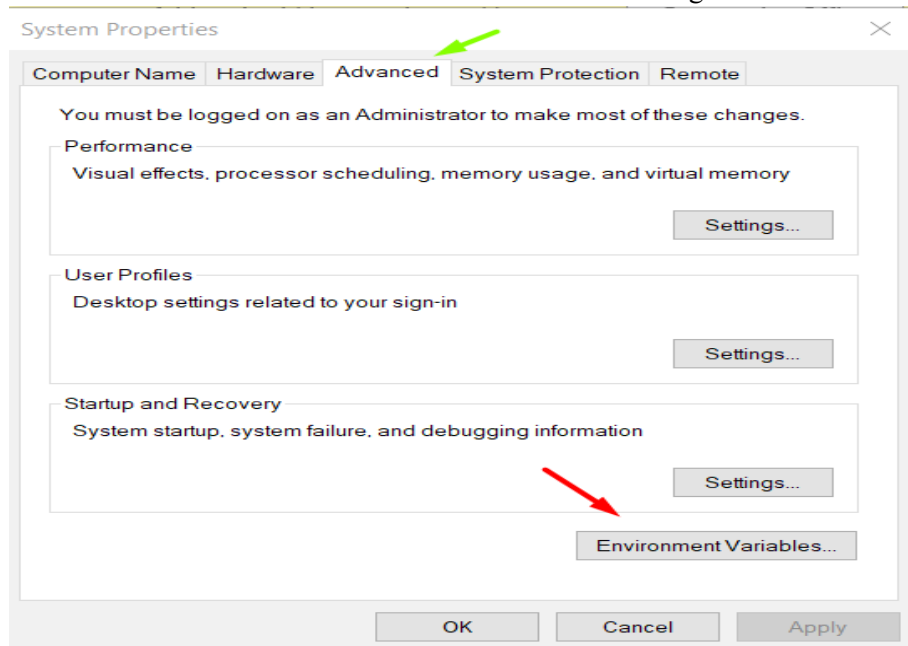

- III. Untuk menghentikan WEB Server Apache, klik tombol **STOP** pada kolom action Module Apache.

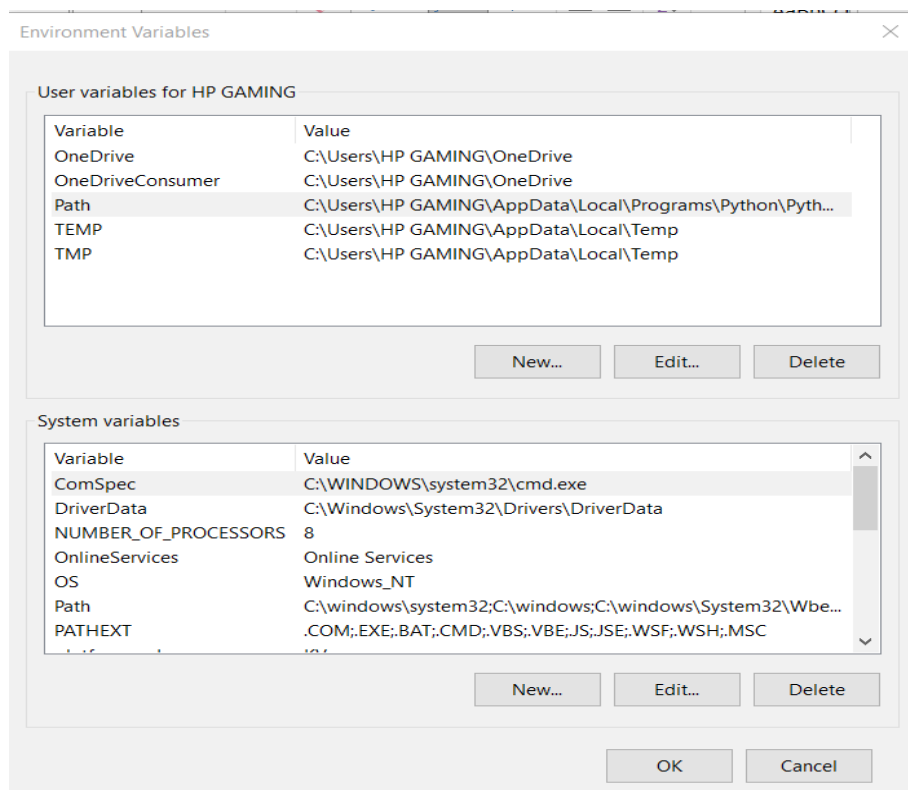

2. PHP

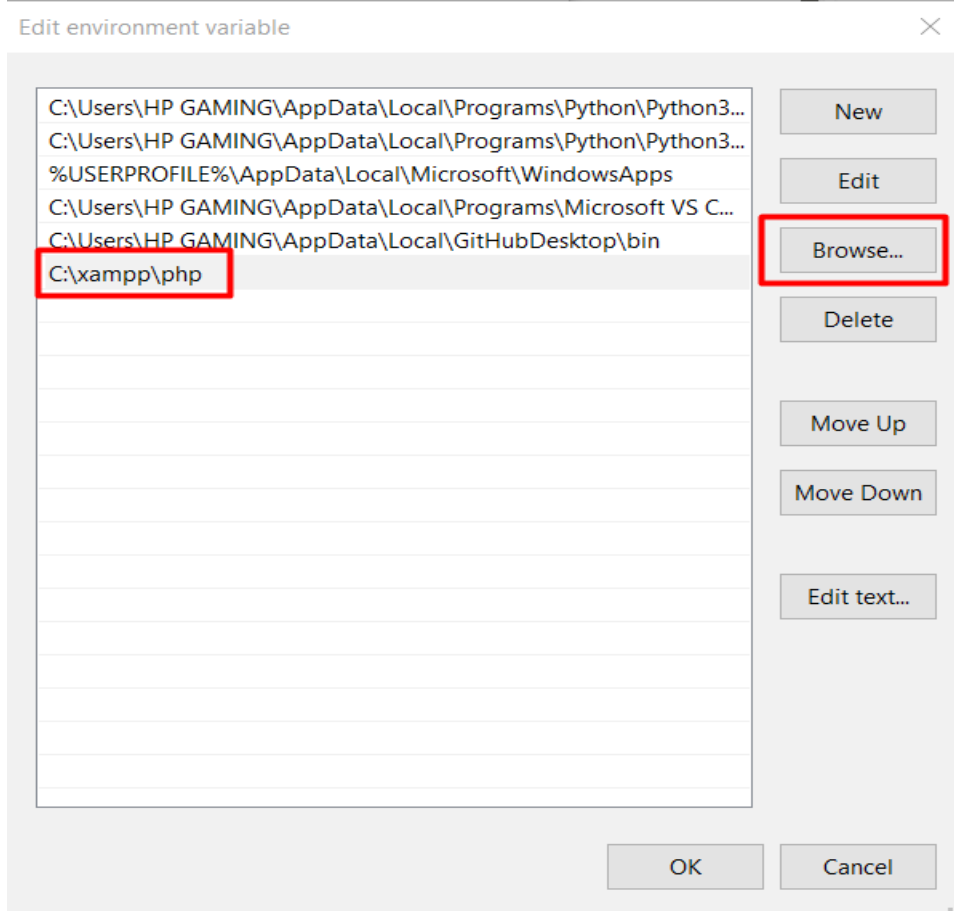

- I. Cari “edit the system environment variables”.
- II. Klik “Advanced” lalu klik “Environment Variables” di bagian bawah kanan.

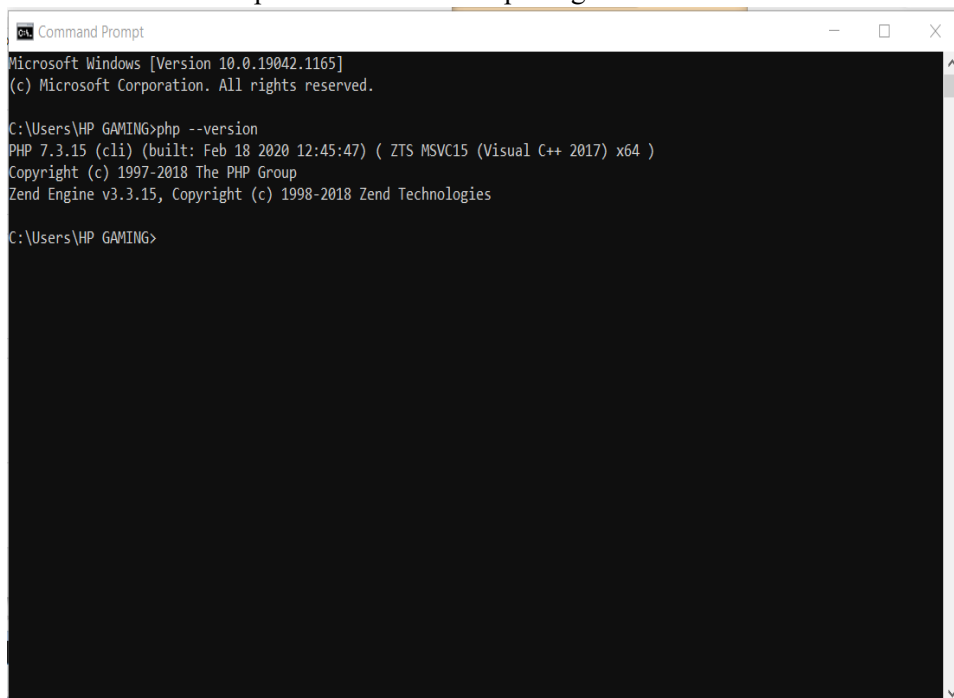

- III. Pilih Variable **Path**, kemudian klik tombol **Edit**

IV. Klik Browser lalu cari `xampp\php` dan pilih “OK”

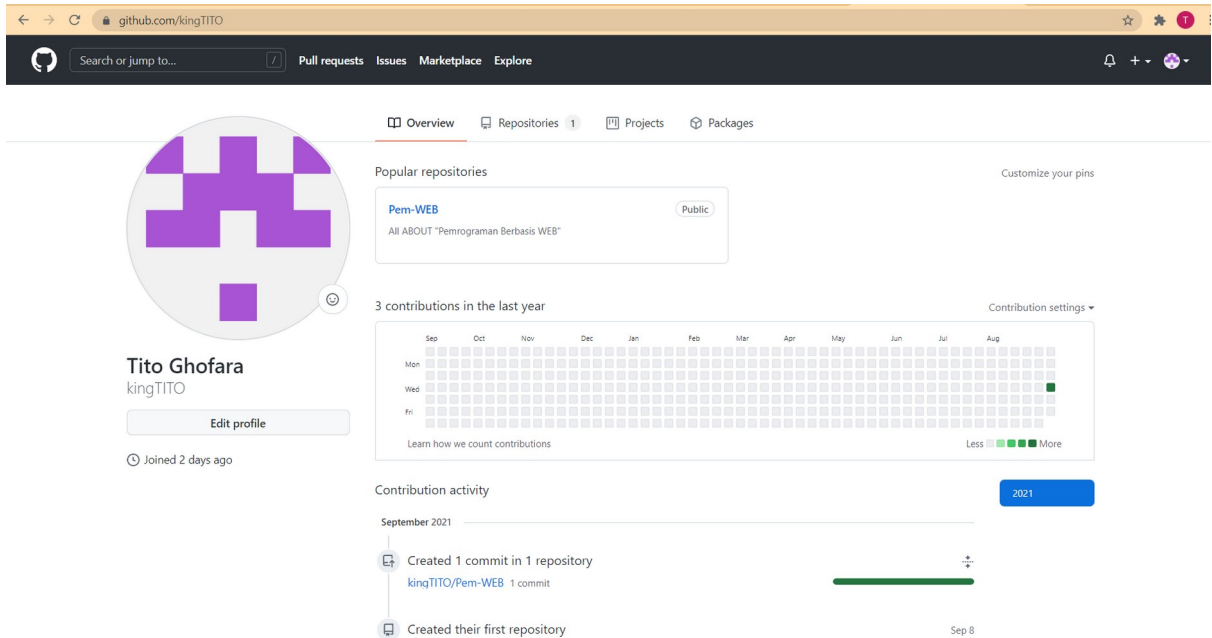

V. Lalu cek di *CMD* apakah **PHP** sudah terpasang.

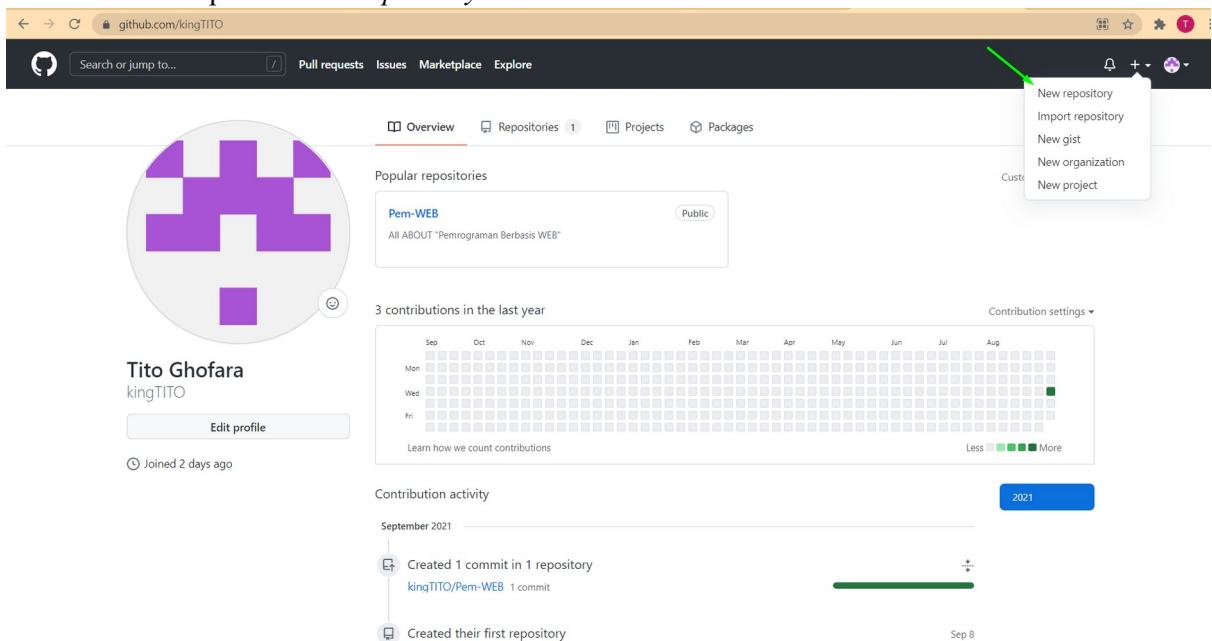

■ Instalasi Git dan Push Repositori Github

1. GITHUB

- I. Akses laman **GITHUB** <https://github.com/>
- II. Membuat akun **GITHUB**.

III. Setelah sudah membuat akun, untuk membuat repository. Klik tanda “+” lalu pencet *New Repository*.

- IV. Tulis Repository name lalu klik **Public** dan klik **Add a README** file setelah itu **Create Repository**.

The screenshot shows the GitHub 'Create a new repository' page. The browser address bar shows 'github.com/new'. The page title is 'Create a new repository'. Below the title, it says 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'

The 'Owner' is set to 'kingTITO'. The 'Repository name' is 'PEM_WEB', with a green checkmark indicating it's valid. A red arrow points to this field. Below the name, it says 'Great repository names are short and memorable. Need inspiration? How about [psychic-umbrella?](#)'

The 'Description (optional)' field is empty.

Under 'Visibility', the 'Public' option is selected (indicated by a blue dot and a red arrow). The 'Private' option is unselected. The descriptions for each are: 'Public: Anyone on the internet can see this repository. You choose who can commit.' and 'Private: You choose who can see and commit to this repository.'

Under 'Initialize this repository with:', there are three checkboxes: 'Add a README file' (checked with a red arrow), 'Add .gitignore', and 'Choose a license'. Each has a brief description and a 'Learn more' link.

At the bottom, there is a green 'Create repository' button.

2. GIT

Berhubung Tutorialnya sudah ada di Kulino, saya akan menampilkan bukti Instalasi GIT.

a.

b.
